## Testimonials "Pro Groomer" PR72

*At Heying Co. we periodically receive feedback from customers who have purchased our equipment. We do not "pay" for testimonials. Following are just a few of the customers who wrote to simply communicate how they felt about their purchase.*

***"We Make Dirt Look Good!"***

**Johnie McDow**, Schertz, TX

I am the President of Buffalo Valley Youth Association in Schertz, Texas, a northeast suburb of San Antonio. A few years ago we bought one of the PR72 groomers. We had 5 fields at that time and two skinned for dual purpose. We purchased our second PR72 groomer this year when we opened our new complex which added 4 more fields on the other side of town. I have been the President of BVYA for about 15 years and actively involved in field maintenance. The groomer is by far the very best investment we ever made as a league for grooming the fields. The electrical lift option is worth every dime as well. Our original lift was a manual one. We added electric lift to the first groomer when the option became available. We have pulled the groomer with several different pieces of equipment. It works best with the small Kubota tractor/mower we have, but we have also easily pulled it with our large riding mower. We can easily get down the base paths and around home plate. We have had no problems with the units. They are worth every penny we've spent. I strongly recommend the unit. Like all grooming tools, with a little practice it will make grooming the fields much easier. I have taken some practice fields that were in pretty rough shape and fixed them so they could be used by the teams.

**John Lombardozi**, Herndon, VA

We are very excited about your Pro Groomer. We renovated two fields on Friday, removing weeds and leveling. Then we used it on Saturday to prepare our High School field. The groomer worked every bit as advertised. It was outstanding at all fields.

**Ken Bush**, Columbus, GA (2004-AAAA State Champions & Ranked #2 HS in the nation by USA TODAY)

We received our Pro-Groomer this week and I just wanted to share with you how our initial trial of your equipment went. Here at Columbus High School we maintain our fields through volunteers. Mainly player's fathers working on the fields. The "Booster Club" purchases all necessary maintenance equipment. We, like a lot of schools are tight on budget. We really were concerned whether or not the Pro-Groomer was the right piece of equipment to purchase.

First, let me share with you what condition our field was in. Here in the deep south we are blessed (ha-ha) with what the locals call "Georgia Red Clay". When it's dry it pretty much hardens to a cement and when broken up, it clots. With our infield being mostly red clay we decided to till it up and begin a process of renovation, mixing in an infield material. We tilled the entire infield, mixed in about two tons of new infield material and began to level. After doing this part our field was very uneven and was full of dirt clogs, rocks and some debris from the new clay we placed on the field. It was in pretty rough condition. We had started to "rake" it by hand and drag the infield using some other pieces of equipment to attempt to level it and begin the "healing". It was very time consuming, hard work and we didn't make much progress. Then, we received our Pro-Groomer. We took it to the field still on the pallet. In about a hour and a half we had it ready to use. The instructions were clear and simple. We had no issues putting it together. We read the instructions for set-up and did so accordingly.

We hooked it up to our towing machine and I spent about an hour using the Pro-Groomer on the infield. Using it was easy and we only had to make minor adjustments. The results were nothing less than spectacular! Unbelievable how it performed! I will e-mail pictures later but the results were amazing! We could have played on it that day. The field was level and looked as if it were quite literally in a College or Pro field condition. The Pro Groomer was everything advertised, and more. We will definitely take our field care to the next level with your equipment. The Pro Groomer purchase was definitely the right choice. Everyone who saw this equipment in use was amazed. People who saw the field before and after grooming agreed it looked like a different field. And our facility is already one of the top in the state.

Thank-you for everything you've done to assist us. I will definitely be sharing with others in our community the impact we see.

**Scot Gillis**, San Jose, CA

Heying Co., we received the PR72 Pro Groomer about a month ago and it is working great. We are very happy with it's performance.

*Scot Gillis, Leland High School, San Jose, CA*

**Greg Edwards**, Dripping Springs, TX

I've been meaning to sit down and send you a note. Our maintenance staff has deemed the Pro Groomer PR72 the best purchase we ever made. It has made a big difference already. I have made recommendations several times for others to look into the machine.
