

# Hard Tooth Harrow Drags

Hard Tooth Harrow Drags- also known as ATV Harrows or ATV Drags, are heavy duty all steel construction. The pull bar allows the teeth to be adjusted three different ways: Heavy aggressive action, medium action or upside-down (teeth up) for light action. Each harrow comes complete with heavy pull chain and hook.

Uses include dragging ball fields, airing out moist granular surfaces, breaking up hard surfaces, stimulating early turf green up, loosening thatch, working in seed or fertilizer, preparing seed beds, race tracks, rodeo arenas, dirt and gravel roads or yards, and, it is one of the few affordable and effective tools used to maintain sand beach fronts.

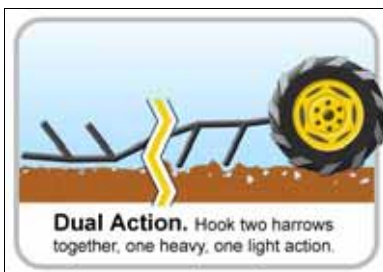

## Sizes available:
