Customer chooses from 5 "Operator Control Systems" (more choices than any other manufacturer). Includes 4 choices of electric lift plus manual lift.

Heavy Duty Electric Actuator.

Height Adjustment & Leveling System.

Exclusive 2-Bladed Leveler Implement. "Level-Flo" (Best in the Industry).

No-Air, No-Flat Wheels.

Rear 2-Brush Smoothing Broom.

99% of Assembly Done at Factory!

---

Levels infield without disturbing the important layering between the top infield material and the lower sub soil layer.

Break up the hardest of infield during the season. Great for restoration during off-season.

VibraTine Technology available. Shatter, pulverize, loosen and rejuvenate.

---

Front & Rear Blades cut 100% of the surface they contact. No other infield groomer has this.

Leverer Implement "Level-Flo2" technology levels infield and keeps them level, we guarantee it!

---

We make the only Infield Groomers on the Market with Wireless Remote Control 12 volt on-board lift control system.

Accessories-Options available:
- Chisel Scarifier
- Spring Tine Scarifier
- Drag Mats
- HS Grading Bar
- Rock Basket
- Tongue Stand
- Ball Coupler Hitch

Plus, accessories for Operator Lift Control systems!
Key Benefits PR72

- Levels - Mixes - Smoothens
- Leveling Implement “Locks into position to guarantee leveling takes place”
- Cuts High Areas and Fills Low Areas
- Reduces Need for Hand Raking
- Breaks up hard infields (optional accessories)
- Maintains safer playing surface
- Deters water puddling
- Controls Weeds
- More Lift Systems to choose from than any other manufacturer (and our lift systems are made in the USA).

1) Level

Leveling Implements “Lock into a Grading-Leveling Position”. So called “Floating Leveling” implements do not level infields.

2) Smoothen

Smooth, Professional Playing Surface. Our finishing brooms made of tough poly bristles for long wear.

3) Pulverize

Pulverize extremely hard infields (optional).

Some Important Features that Set it Apart
Leveler Implement + Adjustment System produces “Level” and “Smooth” Infields.

Engineered to Level.

* Wheels ride inside the ends of the leveler implement. Provides smooth path for the wheels. Less bouncing on rough infield surface.
* Two (2) blades level better than one. Cuts off high areas. Carries material along as it travels. Releases material into low areas.
* Leveler Does Not Float! To provide true leveling an implement must not float. Leveler is fully adjustable front to back and left to right. And it locks into the position you set. Each side of the front blade adjusts independently to keep the implement level left to right and to adjust the height of the front blade. The rear blade adjusts and locks into position using the rear electric cylinder (Manual Lift uses the Lift Arm and Turnbuckle to adjust rear blade).
Optional Accessories

Optional Scarifiers. Pulverize - Shatter - and Break up Hard Infields.

**PRCH-5825 Chisel Scarifier**

Chisel Scarifier is more effective on hard infields than the Spring Tines. Pulverizes & shatters hard-compacted infields to improve playability. Exclusive abrasion resistant steel teeth. Completely depth adjustable. Mounts to the rear of the Leveler implement. When not in use it stores on the upper “non-engaged” pins without making contact. When needed it’s dropped down to the “engaged” pins to pulverize. Rear Broom and Drag Mat Drag can be mounted behind Chisel to help break up chunks and smoothen. Teeth are easy to replace when needed.

*Also see Drag Mat option that helps break up chunks created by the Chisel Scarifier.*

**In-Season.** Should only be used to pulverize the very top portion of infields (1/4” to 1/2” or so) during the season.

**Off-Season.** Capable of deep till to depth up to 2-3/4” to mix material, remove weeds, etc. but should never be used deep enough to disturb infield layers.

**Two reasons the Chisel Scarifier cannot be used while grooming.**

1) Infield layers are very important. You should never penetrate too deep into an infield and disturb the layers. If the Chisel was used while grooming then it might mask, or hide, what is actually being done to the infield. So, for safety, we design the Chisel Scarifier process to be a separate process from grooming.

2) It demands a lot of power especially when penetrating deep into infields (during off-season).

**PRST-6800 Spring Tine Scarifier**

Spring Tine Scarifier Can be used while grooming - that’s the only advantage it has over the chisel scarifier. Spring tines are not as effective breaking up hard infields as the hard tooth chisel. For customers who want to be able to lightly pulverize ahead of the grooming process. It attaches to the front of the machine and provides pulverizing action ahead of the Leveler & Broom implements.

Two rows of staggered spring tines. Each row independently adjustable (without tools) to different angles. Mounts to front of the groomer.

*Warning: The Spring Tine Scarifier adds approx. 48 lbs. to the front of the groomer (tongue weight).* This adds to the total weight when lifting on the tongue to connect the groomer to a tow machine (or when disconnecting). This is most noticeable for those who have the for “WR” electric lift system which includes a heavy 12 volt battery on board. A chisel scarifier on rear of machine does help counter weight the spring tine scarifier.

**Note:** Customers with extremely hard infields (especially infields with sand mixtures) should consider the Chisel Scarifier which is more effective on hard infields.

**Drag Mats (2 Sizes available).**

Steel Drag Mats are especially useful when breaking up hard infields (which creates chunks).

**Two Choices of widths.**

- **72” wide x 36” deep** (same width as 72” Broom)
- **78” wide x 36” deep** (overlaps 72” Broom)

Option includes our exclusive brackets that not only pull the drag mat during use but also hold the rolled mat during travel off the field. No tools needed to adjust or remove the mat.

**ALDM-7236 (72” Wide x 36” Deep)**

72” wide mat is same width as 72” Rear 2-Brush Smoothing Broom. (Drag Mat is adjustable side to side in 1” increments if desired). This option includes our exclusive Drag Mat Brackets.

**ALDM-7836 (78” Wide x 36” Deep)**

78” wide mat is overlaps the 72” Rear 2-Brush Broom at each end. (Drag Mat is adjustable side to side in 1” increments if desired). This option includes our exclusive Drag Mat Brackets.

**ALDM-1000 Drag Mat Brackets Only**

Order this option if you wish to use our exclusive Drag Mat Brackets with your steel roll up drag mat.

*Note: We install a 1” square support tube to the front pull edge of all of our Drag Mats to add support and so they mount correctly in our brackets. If you use your own drag mat with our brackets then we recommend you also install a square support tube.*
High Speed Grading Bar

Customers choose the PR72 because they want perfect leveling. To provide this benefit the Pro Groomer performs at optimal speeds of 4 to 5 mph. There are times however when some customers need a quicker way to groom infields. Customers such as those who:
- Run all day tournaments.
- Run double headers.
- Have lots of fields to cover.

**Tournaments:** Customers who run day long tournaments with very tight schedules groom all of their infields before the day’s play with the normal 2 bladed Leveler. Then between games, if time is short, they cut prep time in half using this high speed implement to quickly smoothen infields (doubled your speeds up to 8-10 mph). After the day's games are done they groom infields with the 2 blade Leveler Implement (normal process) to bring them back to perfectly level.

**Double Headers:** Customers who have double headers groom their infield before the first game with the normal 2 bladed Leveler. Then between games, if time is short, they cut prep time in half using this high speed implement to quickly smoothen infields (doubled speeds up to 8-10 mph). After the final game they groom with the 2 blade Leveler Implement (normal process) to again achieve a perfectly level infield.

**Lots of Infields to Maintain:** Customers with many (sometimes dozens) of infields may not have the time to perfectly level every infield every day. Some fields are groomed the normal process every day - just not all of them. Say for example a customer has 18 fields. Each day 6 infields are groomed with the 2-Bladed Leveler. The remaining 12 are groomed at twice the speed with the High Speed Grading Bar. The next day a different 6 fields get perfect leveling, and the process keeps rotating.

To maintain our "no tools needed engineering" we designed the High Speed Grading Bar to attach to the rear of the Leveler the same way that the Chisel Scarifier attaches. It’s stored on the upper “non-engaged” pins (it will not contact the infield when in the non-engaged position) so it’s ready to use when needed. Then it’s quickly moved down to the lower “engaged” pins for high speed grooming (when in this position the 2 bladed Leveler does not contact the infield surface). The Rear Finishing Broom (and Drag Mat if you have it) attach directly to the High Speed Grading Bar for final finishing.

**More Accessories & Options**

<table>
<thead>
<tr>
<th>Rock Basket</th>
<th>1-7/8” Ball Coupler</th>
<th>2.00” Ball Coupler</th>
<th>Tongue Stand</th>
</tr>
</thead>
<tbody>
<tr>
<td>For customers who have rock or other debris problems in their infields.</td>
<td></td>
<td></td>
<td>Connects behind the hitch on tongue. When the groomer is unhooked the stand keeps the end of the tongue off of the ground or floor.</td>
</tr>
<tr>
<td>Attaches behind rear blade of leveler. Material travels over rear blade and falls into basket. Debris catches in basket. Easy removal to empty.</td>
<td></td>
<td></td>
<td>During grooming it folds up out of the way (locks in place with one quick pin). When storing the groomer on concrete the caster wheel allows for easy movement of the machine around the storage area.</td>

<th>ALSB-1212 “SB” Backup Control</th>
<th>ALPW-1212 “PW” Backup</th>
<th>AL-E-098 Transmitter</th>
</tr>
</thead>
</table>

**Add’l “HW” wiring pkg.**
When you order the “HW” Lift System you might want to wire an additional tow machine to pull the groomer. Includes all necessary wiring to “Hard-Wire” one additional tow machine.

**“SB” Corded Switch Box Backup Control System**
Consider the portable “SB” operator system as a backup for “WR”, “PW” or “HW” systems.

**Who needs a Backup Control?**
If any problem arises with your original operating system (broken wire, misplaced transmitter, dead groomer battery, etc.) you have this alternate “backup” control system available to operate the groomer. The “SB” uses temporary clamps to attach to your tow machine 12 volt battery and totally bypasses the WR, PW, or HW system (except the Cylinder). Offers peace of mind that a complete backup control system is on hand if ever needed. Especially useful to those who “just can’t be broke-down with their groomer”. Complete package.

For more details See the PR72-SB Machine catalog pages.

**“PW” Portable Wireless Backup Control System**
Consider the portable “PW” operator system as a backup for “WR”, “SB” or “HW” systems. If any problem arises with your original operating system (broken wire, misplaced transmitter, dead groomer battery, etc.) this alternate “backup” system can bypass the original operating system (except cylinder) and operate the groomer. Uses temporary clamps to attach to your tow machine 12v battery. Offers peace of mind that a backup control system is on hand if ever needed. Complete pkg.

For more details See the PR72-PW Machine catalog pages.

**Additional Wireless Transmitter for “WR” or “PW” Systems.**
For customers who have “WR” or “PW” Lift System. When you order consider an additional transmitter so you have an extra on hand.

We stock Transmitters

**Convert a Manual Lift groomer to Electric Lift.**
Customers who currently own a Manual Lift machine can convert to Electric Lift. More electric lift choices than any other manufacturer. Refer to info elsewhere in this catalog for details about electric lift systems.

**PRWR-6000 “WR” Wireless Remote Control Elec Lift System**
**PRPW-6000 “PW” Portable Wireless Remote Control System**
**PRSB-6000 “SB” Corded SwitchBox Elec Lift System**
**PRHW-6000 “HW” Hard-Wired Elec Lift System**

---

**Warranty** (in a nutshell): Heying Company machines carry the following warranty on parts and workmanship, to be free of defects, under normal and intended use and service conditions, of:

Three (3) years parts and workmanship on Heying Company manufactured parts.

One (1) Year on parts not manufactured by Heying Company, including but not limited to:
- Wheels, brushes, electrical cylinder (actuator), electric system parts, wireless remote control systems, switches, batteries, chargers, etc.
- Excluded is this warranty is Normal Wear and Tear on Parts resulting from natural and intended use.

(Note: Warranty above is a partial writing - for a complete warranty please inquire. If you discover a better warranty on similar equipment we would like to see it).
Lift Systems & How They Work

Wireless Remote Control (Electric System on-board). Includes full size 12v battery, weather resistant wireless transmitter and receiver, battery charger, and battery monitor. **Note:** This is the only electric lift system with it’s own on-board battery (does not require tow machine battery). Top choice for convenience and for “big users” who have lots of fields, run tournaments, or all day games. Other systems could wear down the battery of the tow machine when the groomer is used all day long. **NEW in 2019** includes a cored auxiliary switch and 10 ft. cable (use as temporary backup control).

“Portable” Wireless Remote Control. **NEW** Same wireless control as the “WR”. Uses Battery from Your Tow Machine to power to system. Includes portable power harness that connects to tow machine battery with alligator clamps. The groomer also has tongue wire harness. The two wires connect at the rear of the tow machine to power the wireless electric system (Does not include 12v battery, battery charger and battery monitor). Includes our new emergency cored auxiliary switch and 10 ft. cable (use as temporary backup control).

Corded SwitchBox Control. **NEW SwitchBox Design 2019.** Corded control system. Uses Battery from Your Tow Machine to power to system. Switch Box is heavy duty and weather sealed. Box has 2 connections: One for Power that connects to 12v battery of tow machine with alligator clamps. One for an Extension Wire that leads back to the groomer tongue wire. Includes two different lengths of Extension Wires to work for all tow machines. **Can also be used as a backup operating system for WR, PW and HW systems.**

Hard-Wired into your tow machine with a Dash-Mounted Rocker Switch to control the electric lift. Uses Battery from Your Tow Machine to power to system. You dedicate a specific tow machine to be wired. Includes all the wiring, switch, connectors, etc. for one tow machine. Want to be able to use other tow machines when needed? Consider two options: 1) Optional HW wiring package, or, consider the SB Backup System. **Note:** your tow machine must have a knock-out switch location available on the dash (for the rocker switch) or you will need to cut your own switch opening.

Manual Lift. Includes our exclusive “posi-lock” design. Complete manual operation of lifting and lowering of implements on the groomer. Lift Arm provides adequate leverage to lift / lower. Quadrant assembly is notched for quick adjustments and always allows you to return to your previous setting. Fine adjustments made with Turnbuckle. **Note:** Grooming adjustments cannot be made on the fly. You must stop to make any adjustment.
PR72 Infield Pro Groomer

Pro Groomer PR72
Electric Lift
Levels, Mixes, Smoothens,
Breaks Up Hard Infields, and More!

Provides Athletes with Safe, Consistent Playing Conditions,
and Saves Labor. It's in a League of its Own.

Model No. —
Represented by the machine shown below.

PR72-WR (Wireless Remote Control)

Everything shown is "standard equipment" with this model.

Enjoy the unwired convenience and complete versatility of this wireless remote control electric lift.
The complete self-contained on-board 12 volt electric system allows the user to pull the PR72 with any adequate towing machine. System complete with Heavy Duty (hd) Electric Cylinder, Full Size 12 Volt Battery, Metal Battery Tray, Plastic Battery Case, Battery Charger, Low Battery Monitor, Manual Override Tools, and our exclusive Wireless Remote Control.
No permanent wiring required to user tow machine.

Height & Leveling System for quick, easy side to side front blade adjustment to ensure that it always cuts evenly side to side. No other groomer on the market has this technology!

If you've ever seen leveling technology like this then what you saw must have been our Pro Groomer because no other machine on the market has this "Level Flo 2" technology. We designed the Leveleer implement to provide perfect leveling every time. The exclusive 2-Blade technology (front & rear) levels and grades by cutting off high areas, mixing material as it travels, and releasing it into low areas where it's needed. The blades cut 100% of their width so they leave no open gaps where material is un-cut. Plus, the leveler achieves perfect leveling without disturbing the important layering between the top infield material and the lower sub soil layer. Completely adjustable in all directions.
Controls weeds. Deters water puddling & compaction.

Over 90% of Assembly completed at the factory! Compare to many other machines that require extensive customer assembly.

Heavy Duty, Durable, Steel Welded Frame.

Premium Powder Coated Finish.

Heavy Duty Tongue & Hitch with Chained Hitch Pin. Hitch quickly adjusts to different tow machine drawbars heights without tools. Tongue easily removes for storage, if desired.

Height & Leveling System for quick, easy side to side front blade adjustment to ensure that it always cuts evenly side to side. No other groomer on the market has this technology!

No-Air, No-Flat Wheels. Flat tires are a nuisance and render a machine un-usuable. We consider what's best for the customer which is why these premium hassle-free wheels are standard on every groomer!

Rear Smoothing Broom. Creates a smooth, professional finish to the grooming process. Brushes mount in our exclusive aluminum channels. Synthetic, long lasting, mildew resistant bristles.

Controls weeds. Deters water puddling & compaction.

"We Make Dirt Look Good!"
Consider the optional “SB” Backup System. More Peace of Mind.

If you’re worried about losing the Transmitter this lift system comes with a 10 ft. long Corded Aux Switch and also includes two (2) manual wrenches that can be used in an emergency to manually raise / lower the electric cylinder. But, some customers who run tournaments or those who just want the peace of mind that they can operate the groomer if they have any problems (misplaced transmitter, dead battery, etc.)...will consider the “SB” Backup Operating System. Adding this optional accessory makes the groomer “Dual Control”. The “SB” System is designed to be portable and can connect to any tow machine 12 volt battery. As a backup it’s not used on a daily basis. Rather, it’s stored and used only when there is a problem with the main control system. It will override / bypass the entire electric system (except the Cylinder).

Advantages: Exclusive “one-of-a-kind” control system.....only offered by Heying Company! Made in USA!

Wireless Remote (hand held transmitter) Control - the Ultimate in user convenience (receiver mounts inside battery compartment). The wireless remote control has immediate response when a button is pressed. It never goes to sleep like many other wireless systems. Pull with a variety of tow machines. Can quickly switch from one tow machine to another. On-board electric system is completely self contained. On-board trickle charge battery charger has safe technology so it can (and should) be plugged in whenever the groomer is not being used. On-board battery monitor emits an audible alert when the battery needs to be charged. No wiring needed to user tow machine. No Cords. Corded Auxiliary Switch (and cord) included. 10 ft. long. Use to operate electric lift if transmitter is misplaced. Stores inside battery case. This is the only electric lift system that has it's own power on-board the groomer (doesn't require power from a tow machine). This is not only convenient to use but also makes it easier to move the groomer even when it's not connected to a tow machine (such as inside a storage shed).

Disadvantage: (Not really a disadvantage) User needs to keep the on-board battery charged. Just plug in the battery charger (use a standard 120v cord).
**Pro Groomer PR72**

---

**Model No.**

PR72-PW Portable Wireless Remote Control

Everything shown is “standard equipment” with this model.

This system uses the same wireless control as the “WR” but to lower the cost we’ve designed it to use the 12V battery of your tow machine for power. We provide a portable connection harness that connects to your tow machine battery. The groomer also has a connection harness. These two wires connect at the rear of the tow machine to power the wireless electric system. Lower cost is obtained by not including the full sized 12V battery, battery charger and battery monitor.

“Worried about losing the Transmitter”? We include a 10 ft. corded auxiliary switch that can be used as a temporary backup control of the electric lift if you misplace the wireless transmitter.

---

**Heavy Duty Tongue & Hitch**

- With Chained Hitch Pin. Hitch quickly adjusts to different tow machine drawbars heights without tools. Tongue easily removes for storage, if desired.

---

**Height & Leveling System**

- For quick, easy side to side front blade adjustment to ensure that it always cuts evenly side to side. No other groomer on the market has this technology!

---

**Multi Purpose Infield Grooming & Maintenance Machine.**

- Like Your Own Personal Ground’s Crew Built Into One Ultimate Machine!

---

**Rear Smoothing Broom.**

- Creates a smooth, professional finish to the grooming process. Brushes mount in our exclusive aluminum channels. Synthetic, long lasting, mildew resistant bristles.

---

**No-Air, No-Flat Wheels.**

- Flat tires are a nuisance and render a machine un-usable. We consider what’s best for the customer which is why these premium hassle-free wheels are standard on every groomer!

---

**Premium Powder Coated Finish.**

Over 90% of Assembly completed at the factory! Compare to many other machines that require extensive customer assembly.

---

**Height & Leveling System**

- Heave Duty Electric Actuator.

---

**Over 90% of Assembly completed at the factory!**

- Pro Groomer PR72

---

If you’ve ever seen leveling technology like this then what you saw must have been our Pro Groomer because no other machine on the market has this “Level Flo 2” technology. We designed the Leveler implement to provide perfect leveling every time. The exclusive 2-Blade technology (front & rear) levels and grades by cutting off high areas, mixing material as it travels, and releasing it into low areas where it’s needed. The blades cut 100% of their width so they leave no open gaps where material is un-cut. Plus, the leveler achieves perfect leveling without disturbing the important layering between the top infield material and the lower sub soil layer. Completely adjustable in all directions.

Controls weeds. Deters water puddling & compaction.
\textbf{“PW” Portable Wireless Remote Control.}

This system uses the same wireless control as the “WR” but to lower the cost we’ve designed it to use the 12v battery of your tow machine for power. We provide a portable connection harness that connects to your tow machine battery. The groomer also has a connection harness. These two wires connect at the rear of the tow machine to power the electric system. (Does not include a 12 volt battery, battery charger and battery monitor).

\textit{“Worried about losing the Transmitter”? We include a cored auxiliary switch that can be used as a temporary backup control of the electric lift if you misplace the wireless transmitter.}

\textit{Unlike anything else on the market!}

\begin{itemize}
  \item \textbf{Advantages:}
    \begin{itemize}
      \item If price is the reason you don’t choose the “WR” then consider this lower cost version.
      \item Does include our unique and unmatched sealed Wireless Remote Control System for “the Ultimate in User Convenience” at a lower price.
      \item The wireless remote control has immediate response when a button is pressed. It never goes to sleep like many other wireless systems.
      \item Lighter weight than the “WR” system (No battery so is not as heavy to lift the tongue). Advantage especially for those who want the Spring Tine Scarifier on their groomer (Spring Tine Scarifier mounts to front of machine thus adding weight to the Tongue).
      \item Pull with a variety of 12 volt tow machines. Can quickly switch from one tow machine to another.
      \item If you choose the “PW” and decide in the future that you should have ordered the “WR” you can always upgrade.
    \end{itemize}
  \item \textbf{Disadvantages:}
    \begin{itemize}
      \item Inconvenience having to plug in the connector (when connecting to tow machine) and unplugging connector behind the tow machine (when unhooking).
      \item For some big users (lot of fields or lots of grooming on fewer fields) this system could wear down the battery of the tow machine. If this is a concern then consider the “WR” system.
      \item Since power is supplied by a tow machine the groomer is more difficult to move around storage shed, etc.
    \end{itemize}
\end{itemize}

\textbf{Consider the optional “SB” Backup System. More Peace of Mind.}

If you’re worried about losing the Transmitter this lift system comes with a 10 ft. long Corded Aux Switch and also includes two (2) manual wrenches that can be used in an emergency to manually raise / lower the electric cylinder. But, some customers who run tournaments or those who just want the peace of mind that they can operate the groomer if they have any problems (misplaced transmitter, dead battery, etc.)....will consider the “SB” Backup Operating System. Adding this optional accessory makes the groomer “Dual Control”. The “SB” System is designed to be portable and can connect to any tow machine 12 volt battery. As a backup it’s not used on a daily basis. Rather, it’s stored and used only when there is a problem with the main control system. It will override / bypass the entire original electric system (except the Cylinder).

---

**Heying Company**

Alton, Iowa  51003  Ph. 712.756.8847  Fax 712.756.8849

Copyright Heying Enterprises.  Made in USA.
“SB” Switch Box Corded Control with Rocker Switch and 2 Extension Wires (12v only).

Incorporates a hand held corded “sb” switch box controller that connects to the user’s tow machine 12 volt battery (with alligator clips) to supply power to the electric lift on the groomer. This lift control system can be easily moved from one tow machine to another which makes it portable. The switch box includes 8 ft. fused power wires with alligator clips for easy battery connection. The switch box also includes a cylinder control stub wire, with sealed connector, where the user connects either the 10 ft. or 18 ft. long cylinder extension wire to control the electric cylinder (actuator).

The 18 ft. length extension wire is popular with customers who have gator type tow machines, or UTVs, Toro Trucks, etc. The 10 ft. length extension wire is popular with customers who have shorter tow machines such as garden tractors, ATVs, etc.

Can be used as a primary (everyday) lift control system, or, as an optional backup to other operator lift control systems.

Advantages:
Versatility to quickly switch to a different tow machine (control system is portable).
SwitchBox is completely weather sealed (unlike anything on the market). Made in USA!
Two “Cylinder Extension Wires” included (5 ft. and 121 ft.) so the user can decide which works best for their use.
Ability to be used as a primary (everyday) lift control system or as a backup to other operator lift control systems (use when needed).
We include a battery compartment (even though a battery is not included). Very useful to store “SB” control parts and tools.

Disadvantages:
Inconvenience of having cords. Must pay constant attention to protecting the cords during use.
Big Users (who have lots of grooming) could experience this system wearing down the battery of their tow machine.
This system requires power from user tow machine. User can’t raise and lower implements without being attached to tow machine for power.

Since power is supplied by a tow machine the groomer is more difficult to move around storage shed, etc.

Note: The “WR” is the only system that does not require power from user tow machine.
PR72 Infield Pro Groomer

Pro Groomer PR72

Levels, Mixes, Smoothens, Breaks Up Hard Infields, and More!

Provides Athletes with Safe, Consistent Playing Conditions, and Saves Labor. It's in a League of It's Own.

Model No. —

PR72-HW (Hard-Wired)

Everything shown is “standard equipment” with this model.

“HW” Hard Wired Lift Control System uses your tow machine’s 12v battery to power the electric lift. Enjoy the convenience of a dash mounted rocker switch always at your fingertips to control the electric actuator on the Pro Groomer. Connector behind your tow machine matches the groomer connector for easy hook-up. We provide everything you need with this “HW” wiring package. Complete with dash-mount rocker switch, wiring, connectors, fittings & protective sleeve to be installed on your choice of 12v tow machine.

Wiring Installation required on user tow machine. For machines other than 12v user must supply voltage converter.

Heavy Duty Tongue & Hitch
with Chained Hitch Pin. Hitch quickly adjusts to different tow machine drawbar heights without tools. Tongue easily removes for storage, if desired.

Height & Leveling System
for quick, easy side to side front blade adjustment to ensure that it always cuts evenly side to side.
No other groomer on the market has this technology!

If you've ever seen leveling technology like this then what you saw must have been our Pro Groomer because no other machine on the market has this “Level Flo 2” technology. We designed the Leveler implement to provide perfect leveling every time. The exclusive 2-Blade technology (front & rear) levels and grades by cutting off high areas, mixing material as it travels, and releasing it into low areas where it's needed. The blades cut 100% of their width so they leave no open gaps where material is un-cut. Plus, the leveler achieves perfect leveling without disturbing the important layering between the top infield material and the lower sub soil layer. Completely adjustable in all directions. Controls weeds. Deters water puddling & compaction.

No-Air, No-Flat Wheels. Flat tires are a nuisance and render a machine un-usable. We consider what's best for the customer which is why these premium hassle-free wheels are standard on every groomer!

Premium Powder Coated Finish.
Rear Smoothing Broom. Creates a smooth, professional finish to the grooming process. Brushes mount in our exclusive aluminum channels. Synthetic, long lasting, mildew resistant bristles.

Over 90% of Assembly completed at the factory! Compare to many other machines that require extensive customer assembly.

“HW” Hard-Wired Operator Lift Control System (12v only)
Incorporates what we call a hard-wired electric lift system that utilizes the user’s tow machine 12 volt battery to supply power to the electric lift on the groomer. This operator system includes all the necessary wiring, in-dash mountable rocker switch, heavy duty electric cylinder (actuator), fuse holder, fuse, wire, connectors, protective wire sleeve (split loom), cable clamps, and zip ties. Requires wiring assembly to user tow machine.

For users who have a tow machine with a dash panel that will accept a Rocker Switch, who want the convenience of a dash mounted rocker switch, and who want to always use the same tow machine to pull and operate the groomer this is the operator system of choice. Note: Optional additional wiring package available for users who wish to wire more than one tow machine to pull and operate the groomer. See optional “HW” tow machine wiring package information.

Advantages:
The “HW” rocker switch control is direct-wired to a 12 volt tow machine. The rocker switch mounts to the dash for convenient control. Easy to use connectors at the groomer tongue and rear of tow machine.
Want more than one tow machine wired to pull the groomer? We also offer optional extra tow machine wiring packages (see optional accessories). Or the optional “SB” portable system can be ordered and used as a secondary control.

Disadvantages:
One dedicated tow machine may be a nuisance if it isn’t available to pull the groomer when it’s needed. You have options.

(order additional “HW” wiring systems to install in more tow machines, or, consider the portable “SB” as alternate control system. See optional accessories).
User needs to install the wiring into the 12 volt tow machine.
Inconvenience of having to connect tongue wire whenever connecting groomer to tow machine (and disconnecting when unhooking groomer). Big Users (who have lots of grooming) could experience this system wearing down the battery of their tow machine.
This system requires power from user tow machine. User can’t raise and lower implements without being attached to tow machine for power.

Since power is supplied by a tow machine the groomer is more difficult to move around storage shed, etc.

Note: The “WR” is the only system that does not require power from user tow machine.

Concerned about having only one tow machine dedicated to pulling the groomer?

Yes, I want Dual Remote Control for my groomer! Consider the “SB” Cored SwitchBox Backup System. The “SB” Cored Switch Box System is portable and can be ordered as an optional “backup” control system for “HW”, “WR”, or “PW” controls. As a backup it’s not used on a daily basis. Rather, it’s stored away and is used only when there is a problem with the main control system, such as a dead battery of the tow machine. The “SB” Cored Switch Box quickly connects directly to any 12v tow machine you desire - to essentially override the original lift control system. It simply provides peace of mind for users who need to know they have a backup lift control system on site when needed.
Posi-Lock Lift Arm. Manual lift and lock system holds the implements in their engaged position while grooming and locks them into a raised position when traveling off the field. After a lock position is chosen with the lift arm fine adjustments are made to the leveler’s rear cutting blade or the depth of the chisel using the Turnbuckle.

“MN” Manual Lift Control System

For customers who simply want a manual lift Pro Groomer.

Includes a Locking Pin on the Lift Arm. Squeeze the locking pin while pulling down on the lift arm raises the Leveler and all other Implements. When released, the locking pin falls into slots in the “posi-lock” quadrant and holds the implements in a downward locked position during use and locks the implements in a raised position when traveling on and off the field.

After the locking pin is “locked” in position fine adjustments can be made to the implements with the Turnbuckle.

PR72-MN
Heavy Duty Manual Lift.
Completely adjustable.

Advantages:
Lower Cost
Easy to operate.
No wiring needed to user tow machine.

Disadvantages:
User must stop when arriving on the infield to lower the implements by hand using the manual lift.
User must stop before leaving the infield to raise the implements for travel.
No ability to make adjustments on the fly like the electric lift models.
All Groomers from Heying Company

WARRANTY

Heying Company machines carry the following limited warranty, from date of possession to the end user, on parts and workmanship, and to be free of defects, under normal and intended use and service conditions, of:

3 years parts and workmanship on Heying Company manufactured parts.

One (1) Year on parts not manufactured by Heying Company, including but not limited to:
- Wheels, brushes, electrical cylinder (actuator), electric system parts, wireless remote control systems, switches, batteries, chargers, etc.

Excluded is this warranty is Normal Wear and Tear on Parts resulting from natural and intended use.

Heying Company’s obligation under this warranty is limited to replacement or repair at the manufacturer’s option. Proof of purchase must accompany any and all warranty claims to Heying Company.

This warranty does not extend to any product or damage to a product caused by, or attributed to freight damage, abuse, misuse, improper or abnormal usage, improper storage or changes and repairs unauthorized by Heying Company including to towing machines.

All freight damage claims must be made immediately and directly to the freight carrier by the purchaser or end user. It is not the responsibility of Heying Company to report damaged freight to freight companies. We guarantee that all shipments leave our facilities free from damage.

Heying Company is not liable for direct or indirect, special or consequential damages arising from, or in connection with, the use or performance of the product or damages with respect to any economic loss, personal injury, loss or damage to property, loss of revenues or profits, or loss of enjoyment.

Any full machine, assembly or individual part returned to Heying Company for refund, replacement or repair must have sufficient proof of purchase included, prior written authorization from Heying Company, be packaged as instructed by Heying Company, and have all freight charges prepaid.

Product returns are subject to re-painting and re-stocking charges.

No other warranty beyond that specifically stated above is authorized or intended by Heying Company.

Choosing a tow machine is the sole responsibility of the user. User should always consult with the towing machine manufacturer for towing capacity and suitability. Heying Company makes no claim and carries no responsibility as to the ability or capacity of any towing machine to be used.
